EDUCATION

HKUST

Master of Science in Business Analytics

2024 - 2026

HKU

Bachelor of Science in Computer Science

2018 - 2022

SKILLS

Full-Stack Development

Machine Learning

Big Data (Spark/Hadoop)

Cloud (AWS/Azure)

ETL Pipelines

Agile

PROFILE

Technically proficient Data Scientist with three years of software engineering experience and a Master's in Business Analytics, specializing in bridging the gap between complex backend systems and actionable business intelligence.

WORK EXPERIENCE

JUNIOR PROGRAMMER (FULL-TIME)

Microsoft | 2023 - 2026

- Engineered high-performance backend services using Python and Java, implementing complex algorithms that reduced server-side processing latency by 20%.
- Architected and optimized relational database schemas in PostgreSQL, writing advanced stored procedures and window functions to handle millions of concurrent transactions.
- Developed robust ETL pipelines to migrate legacy data into cloud-native environments, ensuring 99.9% data integrity through automated validation scripts.
- Led the transition to a microservices architecture by containerizing core applications with Docker and managing deployments via CI/CD pipelines in Azure.
